

Kaipara Cycle Network Connections

Dargaville Connectivity Improvements **OPTION 2**

SHARED PATH

Shared paths are for pedestrians, cyclists, mobility devices and wheeled recreational users (e.g. scooters).

SEPARATED CYCLE WAY

Separated cycle ways are lanes specifically for cyclists.

PAVEMENT MARKINGS

Pavement markings show what transport types should use that area. E.g. image of a bike for cyclists or an image of a person walking for pedestrians.

SEMI-PROTECTED CYCLE LANE

Dedicated cycle lanes on both sides of the road separate cyclists from vehicles and pedestrians.
