Subject: FW: LGOIMA - Media Enquiry: Request for information

Hi Emma

We have two buildings that have been identified as Earthquake Prone, the Maungaturoto Library and a building in Dargaville. See our responses below.

I've been told that because Northland has the lowest seismic risk nationally we have up to 35 years to do the strengthening.

Regards Linda

Hi Linda – sorry about that. Yes all council-owned and controlled buildings is what I'm after.

Thanks,
Emma

Hi Emma

I haven't heard back from you regarding clarity of your request. I note the response is due 15 July. If I haven't heard anything back by the end of this week I will provide information relating to council owned and controlled buildings (not leased) ie our main office, Library and Town Hall.

Regards Linda

Hi Rebecca

Thank you for your LGOIMA. I would like to clarify whether your request relates to council owned buildings or all buildings within our district?

Regards Linda

Subject: Media enq: Request for information

Hello,

Emma Hatton from Radio NZ here. Under the Local Government Official Information and Meetings Act I request the following:

-How much has been spent by the authority since 1 July 2017, (when the Building (Earthquake-prone Buildings) Amendment Act 2016 came into effect) on earthquake-related expenses - for instance seismic reports, engineering checks, building assessments, strengthening work already done etc.

We spend \$1800 on an assessment last year for the Maungaturoto Library. An assessment for the Dargaville building was undertaken pre 1 July 2017.

-How much does the authority anticipate it will spend in the next ten years on earthquake resilience work. Please note this is not how much has been formally approved - but how much could be spent based on estimates (can be rough).

We have no estimates for strengthening the Library and we aren't planning to do this work during the next 10 years.

The last estimate we had for strengthening the Dargaville building indicated that around \$450,000 would need to be spent.

-How many buildings have been identified as needing money spent on them to bring them in line with the Building (Earthquake-prone Buildings) Amendment Act.

two

-How many buildings are still to be assessed by the authority.

None

Please note this request has been sent to all territorial authorities in New Zealand in an attempt to capture the costs local governments are facing to quake-proof their buildings.

If there is anything I can do to clarify these requests, do not hesitate to contact me.

Many thanks,

Emma Hatton
